Measurements in mm

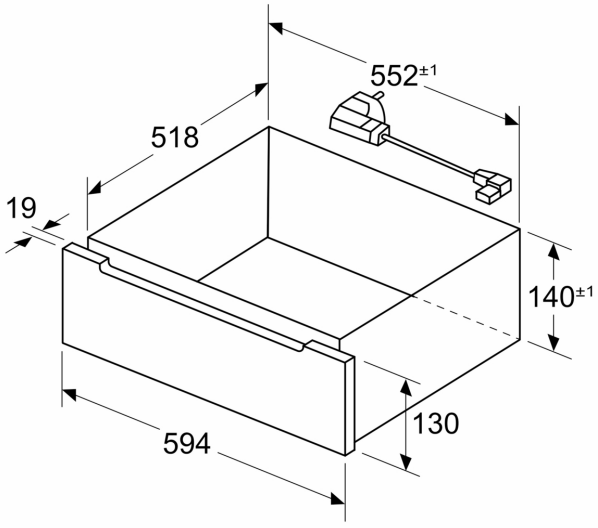

Measurements in mm

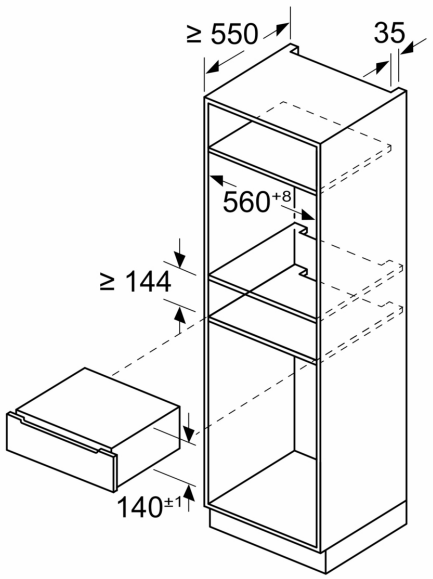

For the combined installation of some electrical appliances, the appliances could be directly stacked on the drawer

Measurements in mm

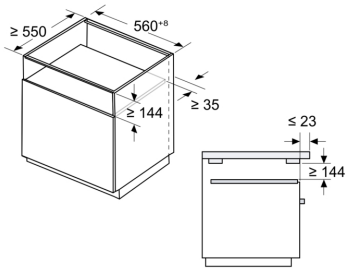

Measurements in mm

SIEMENS

Measurements in mm
Installation below a worktop

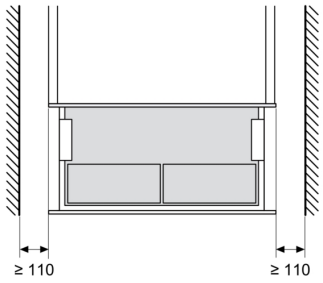

Observe the installation dimensions and the installation instructions when installing below a worktop

A: Electrical connection

Note:

A worktop overhang of up to 50 mm over the drawer is possible, but then the removal of the water tank while the steam drawer is operating is not possible

Measurements in mm
Installation on walls adjacent to a cabinet

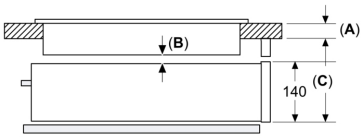

Note:
If the walls on both sides of the cabinet are deeper than the cabinet, a distance of at least 110 mm must be maintained

Any distance smaller than this may affect installation of the appliance

Measurements in mm
Installation underneath a hob

Observe the installation dimensions and the installation instructions when installing in the unit

If the appliance is installed under a hob, the following minimum dimensions must be adhered to (including substructure, if applicable)

	Tabletop installation or flush installation		Tabletop installation or flush installation
	A	**B**	**C**
Induction hob	30/30	5	200/201
Full surface induction hob	40/40	5	210/211
Gas hob	32/43	5	190/193
Electric hob	30/30	5	190/197

A: Thickness of work surface recommended in the hob installation instructions

B: Required distance between hob and steam drawer

C: Required distance between drawer shelf and bottom of worktop

Note:
Pay attention to the hob installation instructions
