

Series 9 Contemporary Tall Built-under Dishwasher

Contemporary

A tall built-under dishwasher with considered detailing and seamless integration, offering increased internal height for larger cookware and entertaining essentials. Telescopic slide racking supports flexible loading, complemented by interior illumination for improved visibility throughout. Auto sensing technology adjusts water and wash intensity automatically, and quiet performance suits open plan living.

- Designed to maximise usable space, with pitch-adjustable tines for deeper dishes and bowls
- Auto sensing wash adjusts water and wash intensity to suit each load

- Auto Door Open Dry releases excess steam, while an Air Curtain directs it away from surrounding cabinetry
- Wi-Fi enabled and works with the SmartHQ™ app for remote control and notifications

DIMENSIONS

Height	857 - 917 mm
Width	597 mm
Depth	580 mm

SPECIFICATIONS

Accessories (included)	
Cutlery basket	•
Kickstrip	true

Capacity and loading

Accommodates angled platters or baking trays up to (lower basket)	370 mm
Accommodates round plates up to (lower basket)	325mm
Accommodates round plates up to (top basket)	220mm (with cutlery tray)
Adjustable height, foldable cupracks	•
Easy lift adjustable upper basket	•
Fold down tines	•
Full width cutlery/utensil tray	•
Height adjustable rear wine glass supports	•
Large crockery insert in lower basket	•
Pitch adjustable tines	•
Place settings	15
Place settings	15
Telescopic slides	•
Wine glass supports with stemware grippers	•

Performance					

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
