

HIZERO

Bionic Hard Floor Cleaner

New F500

Cleaning Made Easy

Hizero UltimateClean™ Cleaning Technology

Hizero UltimateClean™ technology taps into nature, incorporating bionic based science to deliver an innovative way to clean your home floor.

Emulating the way animals lick up liquids and solids, our lightweight, contemporary floor cleaners are energy efficient and whisper quiet.

An all-in-one, cordless hard floor cleaning solution that sweeps and mops utilizing a unique cleaning roller. The cleaning roller is not only hard wearing but is gentle on your floor. And of course, it is self cleaning as it cleans your floor.

No Suction Technology

Unique cleaning roller technology means unlike traditional suction cleaners, there is no dust or debris blown back into the air. So a perfect solution for those families who are allergic to dust.

Quiet

Our No Suction Technology, means a low noise level of only 60dB. This allows you to clean your hard floor without disturbing others in the home.

* Sound pressure tested from 1m distance in the Hizero Lab

Real-Time Internal Clean Avoiding Secondary Pollution

Hizero UltimateClean™ Bionic Cleaning Technology enables real-time Internal clean via its innovative triple-cycle cleaning system.

Brush Roller

Collects hard to pick up human or pet hair.

Solid Waste Container

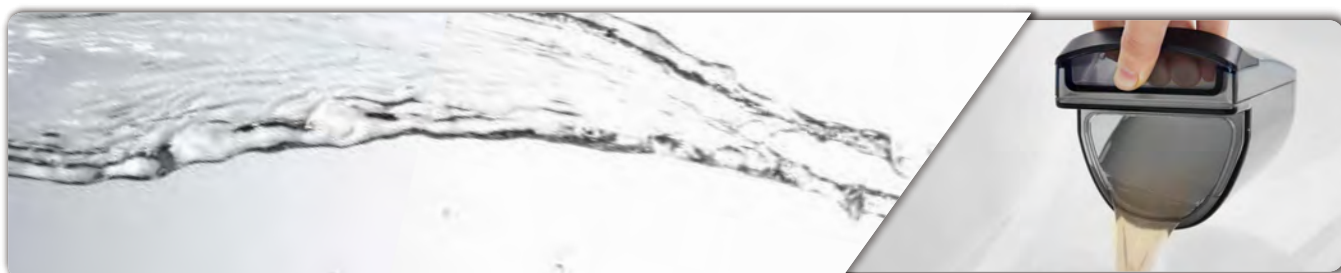

Separates all solids, anything from spaghetti to rice. Collecting solids from the cleaning roller.

Internal Clean

The cleaning roller is constantly showered by clean water during every rotation. This means you only ever clean your precious floor with clean water. No re-transmission of picked up dirt from the roller to your floor. So, in one simple forward motion the floor is clean.

Debris – Liquids – Hair Auto Separation

Solids, liquids and hair are sorted and collected into separate compartments. No clogging, no leakage, no bacteria breeding in the mixture of solid waste and dirty water.

Floor Cleaning- Made Easy

Class leading 60-minute non- stop cordless operation

no matter what mode you choose. Allowing you to clean floors for longer without re-charging.

A flexible design allows cleaning under hard to reach

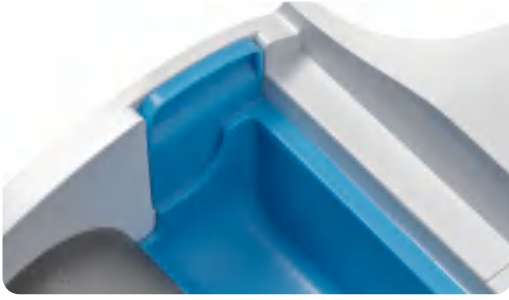

to areas like a chair. The F500 can get as low as a 20° angle.

Easy to maneuver with a Flexi head which can move left or right and of course forward. Weighing only 4.1kg with motorized operation, using the Hizeo is as simple as turning it on.

Easy to Maintain

Solid Waste Container

Separates all solids from liquids, simply brush to clean it.

Dirty Water Tank

Dirty water is separated from solids, making it easy to dispose of the dirty water down a drain.

Hair Cleaning Tool

Clean the brush roller with the supplied cleaning tool in one simple motion.

Snap Fit Dual Rollers

One hand operation.
Hassle free installation.

One Button One Easy Motion

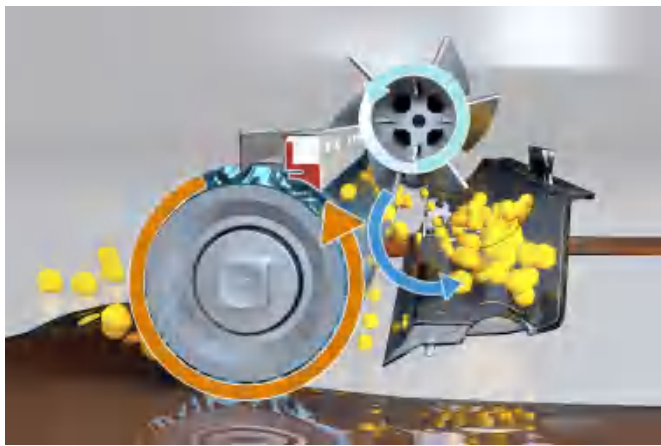

One touch for sweeping and mopping in one easy movement. Leaves floors hygienically clean and streak free.

Multi-Surface Usage

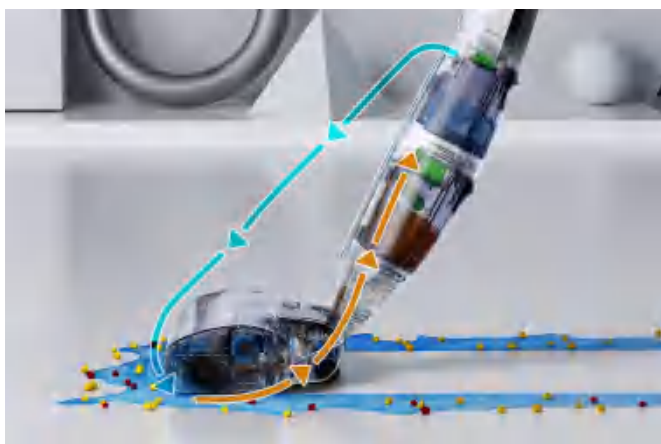

Designed for all sealed hard floors that are water resistant such as natural timber, ceramic tiles, marble tiles, polished concrete and laminates

How does our innovation work?

How does Hizero Polymer Cleaning Roller Work?

- Picks up**
Cleaning Roller rolls automatically over the floor, picking up dirt and dust.
- Separates**
Cleaning Roller picks up solid waste, the brush roller then pushes waste from it. And then automatically separates solids and liquids.
- Flushes**
Polymer Cleaning Roller is kept clean, by being flushed with clean water.
- Self-cleans**
As Cleaning Roller rotates, it absorbs clean water and is ready for the next cleaning cycle.

How does a Hizero pick up liquids and solids?

- Cleans your floor**
The Cleaning Roller rotates to pick up messes from your floor. No matter if it is tomato sauce or wine, or even that hard to clean dust.
- Removes hair**
The Brush Roller is specially designed to pick up hair from your floor.
- Removes solids**
The Brush Roller separates all solid waste into the waste tray, which is then easily removable.
- Removes liquids**
Water Sink squeezes out liquid waste and automatically transfers it to the dirty water tank, free from solid matter.

How do Hizero Water Tanks Work?

- Clean water supply**
Clean Water Tank supplies clean water to flush the Cleaning Roller.
- Dirty water collection**
Dirty Water Tank collects dirty water squeezed out from the Cleaning Roller.
- Always Clean**
The two separate water tanks for clean and dirty water enable Hizero to always use clean water to clean your floor.

Key Features:

No Suction Technology

Unlike a traditional vacuum, Hizero cleaning roller to picks up waste and dust. Which means you do not emit any dust or require a Hepa filter.

Multifunctional Cleaner

Hizero is designed for all types of sealed hard floors. It can sweep and mop simultaneously, leaving your floor hygienically clean and almost dry in one easy motion.

Automatic Waste Separation

The cleaning roller picks up all sorts of dirt from your floor be it liquids or solids. It also separates them into different compartments, making maintenance a simple process.

Real Time Polymer Roller Cleaning

Hizero uses clean water when cleaning your floor. Ensuring every centimeter of your floor is perfectly clean.

Quiet Like a Conversation at 60dB

By the introduction of No Suction Technology, we can reduce the noise level down to that of a normal conversation. So you can go about your cleaning as others are watching TV or reading a book.

Cordless 60 Minutes Non-Stop Runtime

Hizero will operate up to to 60 minutes on both cleaning modes allowing you to clean more floor and charge less. By minimizing energy consumption of our motors, we achieve a longer run time.

Easy to Maneuver

The cleaning head swivels left and right and rotates around 70°, while 20° angle allows you to get into hard to reach places.

Energy Saving and Earth Friendly

Hizero saves water, electricity and your time. You can clean 50 square meters floor area in only 10 minutes by consuming 500ml of water and 0.01kwh electricity.
