## KEY FEATURES

### European Made External Motor

Sirius External Motors (SEM) are designed for quietest hood ventilation. External motors reduce noise by being located away from the hood. Rest easy with our 10-year motor warranty for lasting performance.

### Aluminium Mesh Filter

Easy to install and maintain, but it also provides superior filtration capabilities. Designed with a special deep pleat design that helps capture cooking odours before they enter the room.

### Can be Recirculated

This rangehood offers ducting out or recirculating options. Ducted expels air outside, while recirculating passes the air through specially designed filters and recirculates back inside.

### Induction Safe

This rangehood boasts efficient filters and extraction capabilities to effectively manage increased steam and moisture levels resulting from minimal ambient heat compared to gas cooking methods.

### 1X 5W Led Strip

LED lights emit less heat, saving energy and lasting longer, reducing replacement costs. Ideal for eco-friendly homes with excellent lighting quality.

### Hand Crafted in Italy

Sirius Rangehoods, a prestigious Italian brand founded in 1996, is renowned for its bold designs and commitment to premium materials and craftsmanship, making it a top choice for high-end rangehoods.
